

CUSTOM ANTIBODY SERVICES

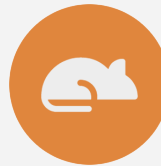

CUSTOM ANTIBODY SERVICES

From cost-effective antibody generation to advanced recombinant and nanobody discovery, Boster supports a wide range of custom antibody development needs.

\$600 Custom Antibody

A cost-effective option for rare species and specialized targets.

Custom Rabbit Polyclonal Antibody

Fast, practical antibody generation for RUO applications.

Custom Mouse Monoclonal Antibody

Hybridoma-based monoclonal development for specificity-driven workflows.

Custom Recombinant Rabbit Monoclonal Antibody

High-affinity rabbit monoclonal discovery for advanced needs.

Nanobody Discovery Service

Custom VHH discovery for compact single-domain antibodies.

ADDITIONAL ANTIBODY SOLUTIONS

Expanded custom antibody capabilities for more specific assay, labeling, recombinant, and model-organism needs.

▶ **Recombinant Antibody Production Service**

Sequence-to-antibody production

▶ **Zebrafish Antibody Omni Solutions**

Tailored for zebrafish research

▶ **Multi-Host Polyclonal Antibody**

Flexible host options

▶ **Antibody Pair Development Service**

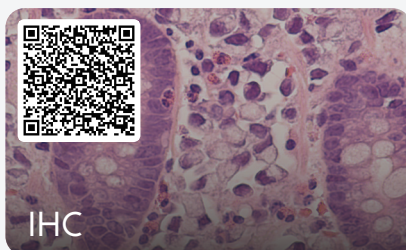

For ELISA and lateral flow

▶ **Antibody Conjugation Service**

HRP, biotin, and fluorophores

EXTENDED RESEARCH SERVICES

We offer high-quality, reliable, and cost-effective immunoassay services to help you achieve your research goals.
